

“ If you wish to see my virtual portfolio in a more dynamic and pleasant way visit: <https://cv.starlly.com> ”

I am a passionate, creative and curious developer, always in search of the extraordinary. My favorite tools are JavaScript and TypeScript, but my curiosity has led me to explore a vast technological universe. I firmly believe that by breaking the barriers of the usual, we can create truly amazing things.

- ABOUT ME

9+ Years of experience...

With over 9 years of software development experience, I have worked on a variety of projects, including web, mobile and desktop applications, as well as artificial intelligence solutions.

My background has allowed me to collaborate in multidisciplinary teams, where I have honed my skills in various technologies.

Javascript/TypeScript is my favorite language, and I have delved into a variety of technologies that employ it. Currently, I am specializing in the fascinating field of Artificial Intelligence with Python.

Technologies...

Main

Javascript, Typescript, React.js, Next.js, Redux.js, Nest.js, Electron.js, GraphQL, HTML5, CSS3, Node.js, MongoDB, Postgres, MySQL.

More

React Native, JQuery, Bootstrap, PHP, Python, Java, Android / Java, SQL, Arduino, Wordpress, Docker

EXPERIENCE

In my career as a Full Stack developer, I have had the privilege of leading and contributing to challenging projects, which has not only strengthened my technical skills, but also taught me the importance of collaboration and effective communication.

EXPERIENCE

- 2022 - 2024

Full Stack Developer

<https://veem.com>

React.js, Sass, Redux, Typescript, PHP, Wordpress

I contributed as a Front-End developer in the payment management application of the Veem platform using React.js and TypeScript. In addition, I collaborated with the web design team on PHP and WordPress based projects, where I developed new widgets, custom plugins and implementations that integrated and extended WordPress functionalities.

- 2020 - 2022

Full Stack Developer

<https://accesspark.co>

Android, Java, Vue.js, Bootstrap, Postgres, MiFare

As a Full Stack Developer (using React, Vue, Java and Android), I put into practice all my skills and acquired new knowledge. I contributed to the development of the company's dashboard and led the development of an Android application for electronic devices with MiFare readers and printers. I comprehensively implemented the functionality of reading and writing cards, as well as printing receipts through the hardware of the devices, which allowed me to deepen in low-level programming, working with hexadecimal and binaries to interact with MiFare readers.

- 2019 - 2021

Front-End Developer

<https://cuidoc.com>

React.js, Next.js, HTML5, CSS3, Sass, Material UI, GraphQL

I collaborated in the complete frontend development of the application, using technologies such as React.js, Redux.js, Next.js, HTML5, CSS3, SASS, GraphQL and Material UI to create a modern, efficient and highly interactive user interface.

- 2017 - 2020

Full Stack Developer

<https://plasticplay.co>

Node.js, JQuery, Bootstrap, CSS, HTML5, Java, MySQL, Android

I collaborated in the integral development of the application, from its initial phase to its final implementation. I developed the website, the web dashboard, the mobile application, and the Kiosk, a platform that allowed users to get money in exchange for recycling bottles. I used technologies such as React.js, Node.js, Electron.js, PHP and Android.

- 2014 - 2017

Full Stack Developer

<https://appfuture.co>

HTML5, CSS, JQuery, Bootstrap, Java, Spring Boot, Postgres, Android, PHP

AppFuture was my first experience in the workplace, a place where I had the opportunity to meet amazing people who taught me the fundamentals and many of the key principles of programming. There I worked with various technologies and took my first steps as a Full Stack Developer, using tools such as Java, Spring Boot, SQL, MySQL, Postgres, PHP, HTML, CSS, JQuery, pure JavaScript and Android.
